THE **CENTER-PIECE** OF THE **MICROPLEX PRINT TECHNOLOGY**

The Microplex Print Controller is the product of our extensive experience and is the foundation of our industrial grade printers. It is print controller technology that is ahead of its time.

All printer operations and emulations are integrated in the firmware. This means that the full functionality of every Microplex printer is available irrespective of the technology used - cutsheet laser, continuous laser or thermal. Microplex printers perform independently of any limitations of existing data feeds or print configurations.

As a technology driven company, Microplex understands that the perfect print solution is not only compatible with a variety of environments, but also cost effective. Our consumables and operational costs are among the best in the industry and ease of operation keeps you in full production.

GHS Compliant
Cut Sheet Laser
Robotic Applications
Continuous Form Laser

WHAT CAN YOU EXPECT FROM MICROPLEX?

When mission-critical applications and production processes demand the highest levels of precision and print timing down to the second, rely on Microplex printers. We have the experience and expertise to implement the latest industrial printing solutions, even in complex enterprise, warehouse, and production environments. Your workflows are not only simplified and accelerated, but also more secure and efficient. We fit your production demands, not the other way around.

Integrated into your in-line robotic manufacturing process, stand-alone, or mobile printing from a forklift, Microplex has a solution.

Microplex has an extensive product line including thermal label, cut-sheet laser and continuous form laser. We provide highly flexible applications, focused on industrial printing applications.

OUR TOP PRIORITY

Microplex can build a custom printing solution for your application. We use a modular approach based on your specifications and workflow.

The development and design for Microplex printing solutions have three criteria:

› Faster
- Highest in class printing speed
- Optimum workflow throughput
- High computing performance
- "Just-in-time" applications
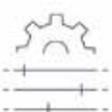

› Easier
- Low maintenance
- Compatibility with any system environment
- Universal interfaces
- Easily programmable
- 40+ printer languages (emulations)

› Value
- Simple installation
- Industrial grade reliability
- Productivity from the first page
- Minimal software configuration
- High value consumables

OUR SOLUTION FOR YOU

The powerful Microplex Print Controller guarantees Microplex printers offer unrivaled compatibility and integration into existing system environments.

Warehousing, robotics, logistics, distribution, pharmaceutical and automotive are just a few of the environments where you will see Microplex printers at full production.

Thermal Printers	Continuous Laser Printers
logiJET T4-2	SOLID F34 (only USA)
logiJET T4-HS	SOLID F40
