

**SOLID Thermal Printer
Print on very heavy
thick media**

**MAXIMUM
PERFORMANCE
EVEN WITH
HEAVY MATERIALS IN
CONTINUOUS OPERATION**

PRINTING TECHNOLOGIES
ENGINEERED IN GERMANY

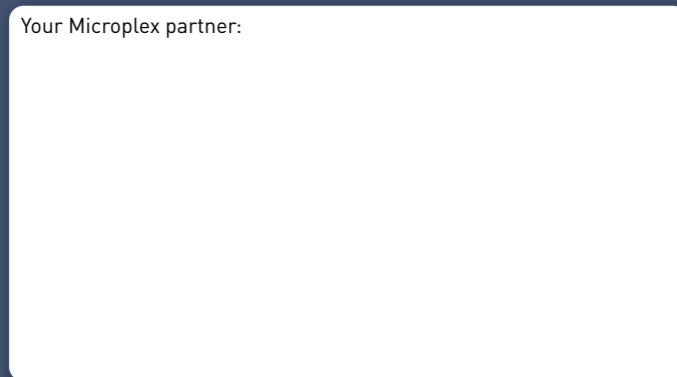

Microplex printers* are enabled for the remote management software SOTI Connect (license necessary)

SOTI Connect is an enterprise-grade management solution that provides an organization complete lifecycle management of its mobile and industrial printers.

* SOTI Connect supported by most Microplex printers – not available for SOLID 45ET, SOLID T4-3 and SOLID T6-2

Version 26.01.2026

FIELD OF APPLICATION

- Price tags to max. 0.9 mm!
- Marking on card stock
- Food guiding cards
- Daily updated shelf marking
- Custom Prints

HIGHLIGHTS / FEATURES / SPECIAL ATTRIBUTES

- Reliable processing of heavy thick media
- Robust cutting blade for strong materials (blister card)
- High speed (from 2 seconds per page)
- Can take a large width (254 mm, 213 mm printable)
- SAP® and AS/400 compatible (by PCL5 + JetCAPS and LAN-IPDS)
- Compatible with standard laser printers
(hassle free switch from laser to thermal)

MAXIMUM PERFORMANCE EVEN WITH HEAVY MATERIALS IN CONTINUOUS OPERATION

Material up to 0.9 mm Thickness

For thick materials up to 0.9 mm or 240 gsm paper weight producing continuously with permanent error free printing.

To carry out this process a printing system is needed which has special properties features. The thermal printers of the Microplex SOLID thermal printer family are uniquely designed for continuous operation with these materials. The SOLID thermal printers SOLID T4-3, SOLID T6-2 and SOLID T8 print on heavy and thick materials in widths of up to 4, 6 and 8 inches at up to 16 inch/s (406 mm/s).

Special properties are as follows:

- > Straight paper path for minimal material curvature
- > Robust cutter designed for maximum paper thickness
- > Variable lengths without loss of time and material change

The SOLID-T Family of Thermal Printers

The SOLID thermal printer family comprises robust 4-, 6-, and 8-inch thermal printers designed for the toughest continuous use in production and logistics environments. They efficiently and quickly print on all common materials up to 240 g/m² and up to 0.9 mm thick, optionally in high-quality thermal transfer or economical and highly efficient direct thermal printing. SOLID thermal printers operate at an impressively high resolution of 300 dpi – enabling even very small barcodes and graphics to be reproduced with exceptional sharpness and clarity.

SOLID T4-3

SOLID T6-2

SOLID T8

“Continuous” Paper Supply of the SOLID T-Family

The printers are specially designed for the professional processing of thick and heavy papers. The SOLID thermal printer can be upgraded with an external reel unwinder to take extremely large stock of material. Equipped for rolls up to 400 mm in diameter. Also, large and time-critical printing tasks can be done in a short time. Through the use of continuous material, variable lengths can be printed and directly cut one after the other through software control, without material change or loss.

- > **SOLID T4-3**
 - 4 inch (106 mm) print width
 - up to 120 mm material width
 - Optional cutter
- > **SOLID T6-2**
 - 6 inch (160 mm) print width
 - up to 185 mm material width
 - Optional cutter
- > **SOLID T8**
 - 8 inch (213 mm) print width
 - up to 254 mm material width
 - Optional power cutter

Multiple Configurations are Possible

Microplex printer with its multi intelligence controller provides multiple configuration possibilities. Via configuration the printers can be adjusted to nearly any application requirement.

More than 40 printer languages (emulations) can be selected. Every emulation can be fine tuned. Beside software signals via SNMP and Status-Out also electrical signals can be used to control the machinery and establish a real handshake between printer and system.

- > Monitoring and control of the print out via electrical signals with 8 input and 8 output channels (GPIO / SPS-Control)
- > Monitoring the printer status via SNMP (fleet management)
- > Individual feedback messages via data channel (Status-Out)
- > User friendly configuration via web panel

Emulations and Barcodes

Thermal printer emulations, i.e.

ZPL II, EPL2, IGP/PGL, Datamax, TEC, IER-Command, Intermec Direct Protocol, LDC, LabelPoint, Etimark MP-1220, cab

Laser printer emulations, i.e.

PCL5, IGP/PGL, XES, Kyocera Prescribe, Kodascript+, AGFA Reno, LN03+, BULL-MP6090

Matrix printer emulations, i.e.

IGP/VGL, IGP/PGL, Epson FX-80, Ansi Genicom, CODE-V, MT-600, IBM Proprinter, IPDS

Further emulations

CUPS-Raster, HPGL, TIFF, Diablo 630, Lineprinter, PDF, ...

Two-width codes

Codabar, Code39, MSI, Interleaved 2/5, Interleaved 2/5 (Datalogic), Interleaved 2/5 (Matrix)

Multiple-width codes

EAN-8, EAN-13, EAN-128, Add-on-Codes, Code 11, Code93, Code 128, UPC-A, UPC-E

High-modulated codes

Postnet, Planet, KIX, Royalbar, USPS One Code

2D-barcodes

Aztec-Code, PDF 417, Datamatrix, Maxi-Code, USD-5, QR-Code

Individual Firmware Adaptation

If the diverse configuration options are not sufficient, we adapt our controller firmware individually and tailor-made to the needs of the customer in cooperation with plant manufacturers and system integrators.

- > Adding possible new barcode technologies
- > Emulation adaptations to fully support the customers print data
- > IPDS customization depending on application

Price and shelf markings are made with SOLID thermal printers on demand in variable lengths in the correct order professionally printed and cut to size.
